The Supply Chain and Logistics Program

"Logistics is the universal thread or "pipeline" that plans and coordinates the delivery of products and services to customers all over the world."

"Supply Chain is the network of retailers, distributors, transporters, storage facilities, and suppliers that participate in the sale, delivery, and production of a particular product."

A Program to Launch You Global

The comprehensive curriculum of the supply chain management program and the logistics and transportation specialist covers all the bases from academic subjects such as supply chain management, warehouse operations, transportation & distribution, quality management, purchasing and inventory, and operations management.

Many of our faculty have longstanding relationships and experience with industry that they share with students. They make connections from inside the classroom to the real world. Quite simply, we have outstanding faculty who "make it real" for our students.

Your Future in Supply Chain and Logistics

Supply Chain and Logistics careers - the second largest employment sector in the United States - offers excellent salaries, opens doors, and provides advancement opportunities.

According to Workforce Innovations, the average annual wage in Logistics and Distribution is significantly higher than all industries in Florida, \$48,669 compared to other industries \$36,804, and the number of new trained workers needed yearly in Florida is over 11,000.
